

Mobility Management

The Ohio Mobility Management Program (OMMP), led by the Ohio Department of Transportation, improves access mobility for Ohioans by increasing understanding and awareness of transportation needs; coordinating transportation options; and building sustainable and healthy communities by integrating transportation into planning.

The OMMP divides the state into 10 regions. The state currently has 28 Mobility Managers who serve 57 counties and is continuing to expand.

Coalition Partners

This project was supported, in part by the Ohio Developmental Disabilities Council, under grant number 2001OHSCDD from the U.S. Administration for Community Living, Department of Health and Human Services, Washington, D.C. 20201. Grantees undertaking projects with government sponsorship are encouraged to express freely their findings and conclusions. Points of view or opinions do not, therefore, necessarily represent official ACL policy.

LET'S GO, OHIO!

Educating, informing and advocating for better transportation systems across Ohio for people who are aging and with disabilities.

Solving the Problem

Transportation is the number 1 issue for Ohioans with mental health diagnoses, disabilities and those who are aging.

Access to transportation means access to everyday life such as:

- employment
- medical appointments
- hanging out with friends and family
- living meaningful lives

Get involved with the Ohio Aging and Disability Transportation Coalition!

Learn how you can participate by emailing India Jones at ijones@sil-oh.org or calling 216-389-1190.

About the OADTC

The Ohio Aging and Disability Transportation Coalition (OADTC) aims to educate and inform local and state-level lawmakers on the importance of including transportation in budgets to increase resources and access for Ohioans who are aging and/or with disabilities. The needs also differ from rural and urban areas in Ohio.

THE OHIO AGING & DISABILITY TRANSPORTATION COALITION

According to a 2017 Ohio DD Council survey, Transportation Challenges for Ohioans with Disabilities, 94% respondents with disabilities were able to attend medical appointments but found other types of activities harder to access. For example, 23% of respondents stated that they could rarely or never get to work; 29% said that they could rarely or never get to a worship service; and 22% stated that could rarely or never get out for just fun and socializing.
